

Operations Warsaw Roles

OPERATIONS DIVISION OVERVIEW

Operations partners with all areas of the firm to deliver banking, sales and trading, and asset management capabilities to all our clients. We work to protect the accuracy and efficiency at every step of the trade for every transaction all around the world. Operations also aids in the design of the technology, the information flows and the processes that make it all work. We constantly monitor these systems and reengineer them to keep everything running as efficiently as possible.

Apply your skills to one of **Four Operations Functions**

- **Operations Design** professionals plan and execute change programs and create new financial operations capabilities to drive efficiency, improve client service levels, and reduce our operational risk
- **Capital Markets Operations** acts as the front-line of the division to enable all of the firm's businesses and supports the life cycle of a trade by partnering with clients and other divisions to mitigate risk and provide excellent client service
- Professionals in **Financial Analytics & Reporting** create financial models and manage the division's metrics to enable informed business decisions and improve the economics of our business
- **Data Science & Engineering** professionals develop cutting edge analytical tools and engineer solutions to address operational challenges

POSITIONS

We are hiring students and graduates into the following positions:

- Apply for the **New Analyst Programme** if you are able to work full time in 2017 – starting from February onwards. This is the entry level for graduates who have minimal work experience.
- Our Internship Programmes provide students with the opportunity to experience what it is like to work in the Operations Division. We offer successful interns the opportunity to join us full time as a New Analyst in the following year.
 - The **2017 Summer Internship** is a 10 week internship designed for current students (Bachelor or Master degree) who can start a full time role in 2018.
 - The **2017 Off-Cycle Internships** is a 1 year internship designed for Master Degree students who are looking to gain part-time work experience while finishing their studies.

WHY GOLDMAN SACHS?

- New Analysts start with a robust training programme
- Our professionals work on the most interesting global challenges
- We offer you best-in-class training programmes and mentoring at every stage of your career
- You will take on early responsibility as part of a growing office
