

Graduates@Sage

Introduction

Sage is a market leader in accounting, business management and people management software. If you are looking to launch your career in a fastest growing sector, then Sage is the right choice. Graduate@Sage program will enable you to develop the skills within various functions and work with some of the most advanced technologies on the market.

What will I be doing?

- You will have the opportunity to learn new skills and technologies, gain an understanding of some of the wider aspects of the development process, and get invaluable experience working in the only FTSE100 software company in the UK.
- The Graduate Program will run for 2 years and will include a fast start onboarding into roles within our organisation allowing you to make a significant contribution to our business quickly.
- You will rotate through multiple assignments with us during the 2 years and be part of the team that develops products for different market segments to enable business builders run their businesses.

Our Product Engineering teams consist of highly skilled software architects, developers, business/compliance analysts, UX, test technicians and technical authors all operating as an integrated unit in a dynamic and customer focused environment. As well as encouraging innovation and agility we also look to embrace the latest technologies to provide ever increasing business benefits to our customers in 23 countries worldwide.

Do I qualify?

Skills or experience in application development would be advantageous but more important is your enthusiasm and commitment, and your ability to work within a team to deliver results in a major software development company.

You'll have a keen eye for detail and an inquisitive mind. You'll be able to demonstrate resilience and determination whilst remaining flexible and responsive to the changing demands of a fast paced environment. You'll enjoy working as part of a well-integrated team and must have good listening, verbal and written communication skills. You will be mentored and supported by an experienced developer throughout the year but will be encouraged to play a full role in the development process.

Where will I be working?

You can be based in Atlanta, Barcelona, Johannesburg, Newcastle, Manchester and Warsaw. You will be part of our worldwide team developing our core product and part of a connected global graduate community. Please specify your location preference while submitting your application

Rewards and Benefits

Sage offers a fantastic range of benefits covering everything from health to life-style choices. In addition to a generous pension, healthcare cash plan, income protection, and life assurance as standard; you are also eligible for benefits such as travel, mobile and computer loans, cycle to work, and gym membership. Sage also operates a market-leading bonus scheme that really rewards our high-performance culture.

How should I apply?

If this is the right Graduate Opportunity for you, please send your CV by submitting your application online
