

AI/ML Software Engineer

Unit8 is a Swiss-based AI startup with offices in Lausanne, Zurich, and Krakow. At Unit8 we work with some of the largest companies in the world and help them solve their problems using Big Data and AI. Our team consists of experienced 10x engineers coming, among others, from some of the well known Silicon Valley unicorns. We use cutting-edge technologies such as Spark, Tensorflow, AWS, Hadoop and modern programming languages: Java, Python, R, Kotlin.

We are currently looking for a talented engineer to join the team in our Zurich office.

What we look for:

- BSc/MSc in CS or related major
- Fluent in at least one JVM based programming language (Java/Scala)
- Experience with AI (ML, Deep Learning) and data science would be a plus
- Highly motivated to learn and be up-to-date with technology

What we offer:

- Work with cutting-edge technology (e.g. Spark, Tensorflow) on projects that matter
- Challenging work inside 10x engineering team
- Tailor-made mentorship program
- Attractive salary and for best candidates attractive equity package
